hygiene	Keeping yourself clean and preventing diseases from spreading
muscles	Something inside your body which connects two bones and which you use when you make a movement
pulse rate	The number of heart beats per minute
unhealthy	When something is harmful towards your health

Human Survival

Here are some important things that humans need to survive:

- Water
- Air
- Food
- Shelter

Here are some things that humans need to stay healthy:

- To have a balanced diet of the right amount of different types of food and drink.
- Exercise regularly.
- Be hygienic

Exercise

Exercise is an activity that needs effort that helps us improve our fitness.

Why is exercise important?

- Exercise makes your heart healthy.
- Exercise strengthens your muscles.
- Exercise makes you flexible.
- Exercise makes you feel good.

Hygiene

When to Wash Your Hands

Hygiene means doing things that keep you clean and stop you from getting ill. Germs are everywhere. Some of them can make us ill.

Good hygiene helps us to stay healthy. Here are some of things we can do to ensure we have good hygiene:

- Have a bath or shower.
- Wash your face.
- Brush your teeth.
- Wash your hands.
- Cut your nails.
- Wear clean clothes.
