

Lower Key Stage 2 - Forest Academy
 Knowledge organiser – Animals including Humans (Digestion and Teeth)

Prior learning:

- To identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat.

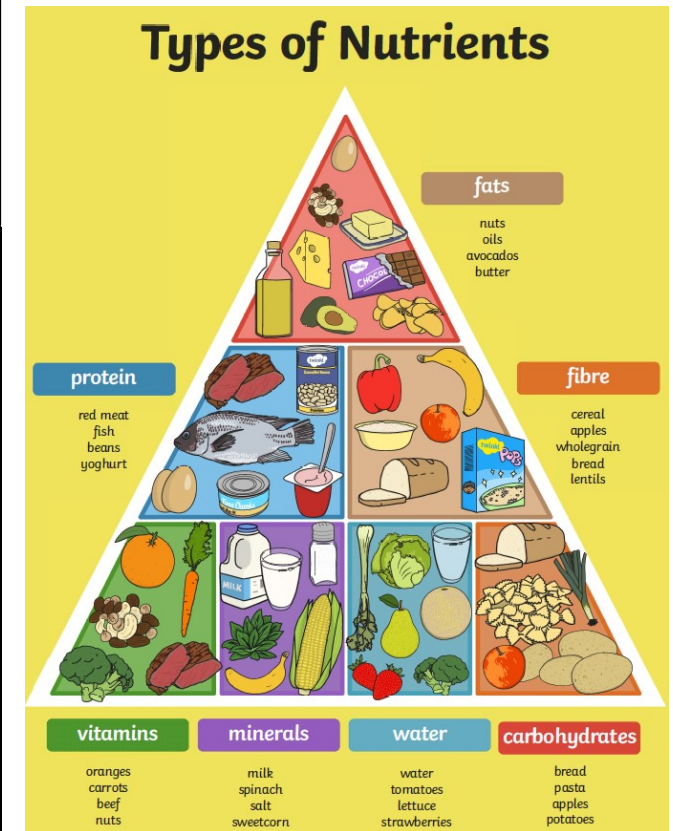

You will now learn:

- To describe the simple functions of the basic parts of the digestive system in humans.
- To identify different types of teeth in humans and their simple functions.

Key vocabulary

| | |
|------------------------|---|
| digest | Break down food so it can be used by the body. |
| oesophagus | A muscular tube which moves food from the mouth to the stomach. |
| stomach | An organ in the digestive system where food is broken down with stomach acid and by being churned around. |
| small intestine | Part of the intestine where nutrients are absorbed into the body. |
| large intestine | Part of the intestine where water is absorbed from remaining waste food. Stools (poo!) are formed in the large intestine. |
| rectum | Part of the digestive system where stools are stored before leaving the body through the anus. |

Human Teeth and Their Function
